With the help of virtual meetings from WebEx, you can hold collaborative and productive meetings with your students with ease.

Here are 5 WebEx features that can help you enhance your virtual classroom!

**Breakout Sessions**
You can use breakout sessions to divide your students into smaller groups during your lesson or meeting. Breakout sessions allow students to collaborate and communicate with each other, in a smaller group setting.

**Whiteboarding**
You can use the whiteboard to interactively collaborate with your students or other meeting participants. Work from a blank whiteboard or open and annotate documents, images, and other files.

**Screen Sharing**
When you share your screen everyone in the meeting can easily see what's being discussed. Anyone can share their screen, but only one person can share at a time. Sharing your screen can be a great way to offer interactive demos or lessons.

**Polling**
You can use a poll to create and share questionnaires. Polls can be useful for gathering feedback, taking votes, or testing knowledge. In addition, polling is a fun way to keep your students engaged and excited about your lesson or meeting.

**Virtual Backgrounds**
With the Webex Meetings mobile app for iOS devices, you can join meetings from your iPhone or iPad. If your current surroundings are distracting, you can hide them by using a blurred or virtual background.

*These options are not available on desktop apps or android mobile devices.*

For help with using these features in your next virtual meeting contact your designated ODELT Instructional Designer or visit help.webex.com
